

Notebook Paper Treat Pouches

Supplies

- 1/2 sheet of notebook paper
- Glue
- Scissors
- Stickers

Instructions

Step 1: Cut 1 sheet of notebook paper in half horizontally.

Step 2: Along one of the two short sides, make a fold about 3/4" in from the edge and apply glue in that small area from top to bottom.

Step 3: Bring the opposite edge of the paper to the folded line and fold over the sticky glue section of the paper.

Step 4: To make the flat bottom of the bag, make a fold about an inch from the edge, forming a crease. Open the base to reveal two triangles opposite each other. Press down and flatten them.

Step 5: Apply glue along the long open edges of the triangles and just one of the two bottom edges of the paper between the two triangles.

Step 6: Starting with the bottom edge without the glue, fold about a half inch in towards the opposite edge.

Step 7: Repeat step 6 on the other bottom edge that has the sticky glue on it. They will overlap each other about a quarter of an inch. At the top of the bag, trim it using scissors.

Step 8: Fill the bag with treats, fold the top over and seal it with a sticker.
